## SAVINGS IN A BOTTLE

- 💰 MAXIMUM SAVINGS
- 🔄 LESS ENERGY
- 🕒 HALF THE TIME

## PUT YOUR CLINIC ON THE FAST LANE... WITH ALMA SPEED GEL.

Alma Speed Gel is a topical formula that maximizes the effectiveness of laser and light-based hair removal technology. Using nanotechnology, the molecules of the gel are designed to bond with the melanin chromophore, significantly increasing energy absorption within the hair follicle.

This increased absorption speeds up the treatment process, allowing you to achieve the same results in **half the time** while also using **less energy** per treatment session. With speed on your side, you benefit from **maximum savings** in treatment time, energy consumption, maintenance and staff resources.

Alma Lasers is a strong, globally-recognized medical aesthetic technology brand. Alma holds a leading position with proven clinical achievements, an impeccable safety record and a firm commitment to building long-term relationships with practitioners around the globe. With Alma, both your patients and your clinic are in good hands.

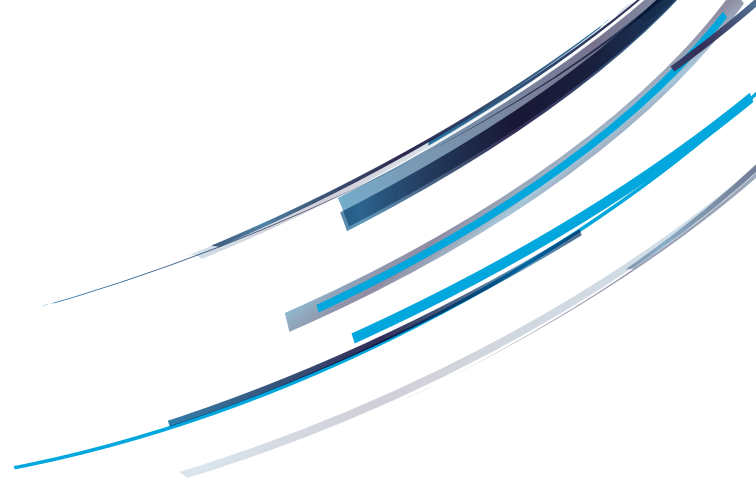

## Save Time & Increase Profit Potential

Alma Speed Gel allows you to perform treatments faster and more efficiently, increasing patient satisfaction with shorter treatment sessions and freeing up precious clinical time to schedule more treatments per day.

## Extend your Applicator Lifespan

Alma Speed Gel reduces the amount of energy required per session, thereby increasing the lifespan of your laser diode or light source. With Alma Speed Gel, results ordinarily rendered during a standard session can now be achieved in half the time. The less usage of your handpiece, the less you need to invest in technical maintenance over the long term.

*\* For external use only. A skin test should be performed prior to the first treatment to rule out any allergic reaction.*

## All Technologies- All Skin Types

Alma Speed Gel works with all hair removal technologies, is suitable and safe for all skin types and has no side effects.

Alma Speed Gel is available in packs of 12 bottles, 50ml (each bottle is enough for an average of 4 treatment sessions covering large areas).

## Alma Speed Gel. Savings in a Bottle.

MAXIMUM SAVINGS

LESS ENERGY

HALF THE TIME

---

*"Alma Speed Gel is effectively absorbed by melanin, therefore enhancing laser absorption within the hair follicles. Total accumulative energy is reduced, while we witness the same results as those achieved without having used the gel- but in half the time. Treatment is suitable for all skin types, is safe and has no side effects."*

Joseph Lepselter, PhD VP Clinical Affairs, Alma Lasers
